

Find your brand - Ratings for 173 bottled waters

The Environmental Working Group rated 173 bottled waters for transparency - what each company is willing to share with you about where their water comes from, how or if it's treated, and how pure it is. More than half of all bottled waters flunked. Bottom line? Drink plenty of water, but avoid bottled water when you can. It pollutes the environment and is often nothing more than tap water. When you must, choose brands with high scores (clear labeling) and advanced treatment.
